NEWS *News for Package* **prefmod**

Changes in Version 0.9-0

- `bin2int()` now throws and error if `bin` contains more than 31 elements (causing and overflow).
- Lots of improvements suggested by **lintr**.
- **prefmod**'s DLL now unloads upon unloading the package.
- Implemented **testthat** tests.

Changes in Version 0.8-38

- Minor fixes.

Changes in Version 0.8-37

- Minor fixes.

Changes in Version 0.8-36

- Minor fixes.

Changes in Version 0.8-35

- Minor fixes and updated documentation.

Changes in Version 0.8-34

- Corrected the coding of the rating-scale items of the ISSP 2000. `CAR`, `IND`, `FARM`, `WATER`, `TEMP`, and `GENE` were coded 0 (dangerous) to 4 (not dangerous) instead of 1 (dangerous) to 5 (not dangerous).
- `plotworth()` is defunct – use `plot()` (or `plot.wmat`) instead.
- Minor fixes and improvements.
